California -- StrataCare Completes Sale of GenSource Division: WEST [01/07/10]

StrataCare Inc. announced Wednesday that it has completed the sale of its GenSource division to P&C Claims Inc.

StrataCare, which is based in Irvine, Calif., said the sale helps its strategy of focusing primarily on medical cost containment and work-flow solutions for national workers' compensation bill review.

P&C Claims is an affiliate of P&C Insurance Systems, based in New York City. StrataCare originally engaged PCIS to help develop a claims software platform.

As part of the agreement, StrataCare will remain the primary bill review partner for joint clients. GenSource clients will continue to benefit from electronic data interchange (EDI) connectivity and integration with StrataWare, the company said.
