

A .NET Browser Point of Sale System for Workers' Compensation

PCIS' **POSVision™** for Workers' Compensation leverages browser based technology, allowing agents to submit applications through your customized webpage. POSVision™ is fully integrated with PCIS' **CompVision™**, policy and claims management system.

- **Upload ACORD Form**

POSVision is a web browser that uploads an ACORD form directly from the agency's management system and verifies for consistency with underwriting rules and validity through an intuitive workflow. This allows single entry of ACORD data by an agency and real-time automated business rule validation by the carrier. The agency may even be extended binding authority based on carrier's underwriting business rules.

- **Rate, Quote, Bind**

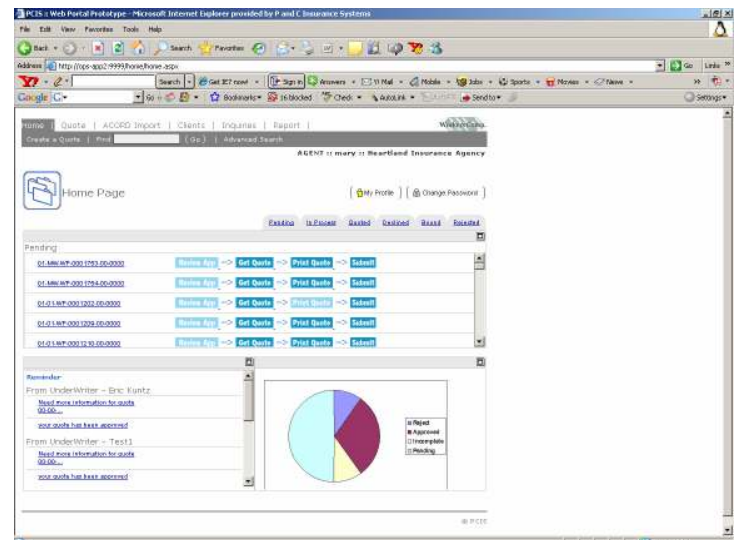

An agent has the ability to work multiple quotes, retrieve instantaneous rating results, print draft quotation documents and communicate with an underwriter real time.

- **Increase Agent/Carrier Efficiency**

The result is minimal data entry and a prescreened submission for the underwriting staff. The outcome of this process is exponential gains in efficiency and reduced clerical errors for the underwriting process.

- **Agency Customer Service**

Agents have secure access to reports showing them their hit ratios, commissions payable, open accounts receivable, and any other information the carrier wishes to share about the agency or agent's policies.

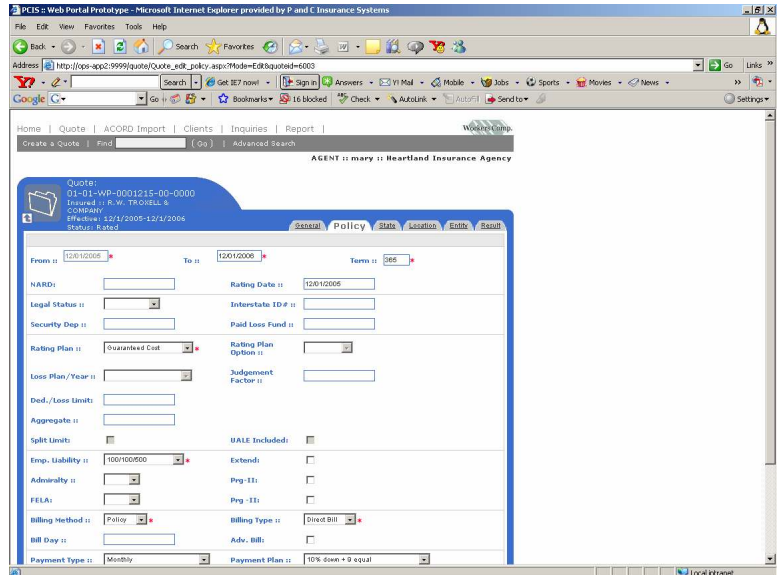

The home page displays a dashboard with the agency's Quotes, Notes from the carrier and sales statistics.

- **Security**

POSVision™ includes extensive integrated security. An agency may only access the quotes and policies, which they submitted. Likewise, all reports are controlled by security, so each report is customized to reflect only the appropriate agency.

POSVision™ is an attractive addition to any carrier's underwriting workflow. You will immediately notice a measurable change in underwriting efficiency.

POSVision™ is an optional module of CompVision™, PCIS' workers' compensation policy management system or can be implemented as a stand alone system. CompVision™ is a 50-state multi-carrier quotation, rating, issuance, policy management, premium accounting, NCCI reporting and audit system.

The easy to use web page guides the agent through their uploaded quotation to easily capture relevant policy information.
