

# P&C Insurance Systems In the News

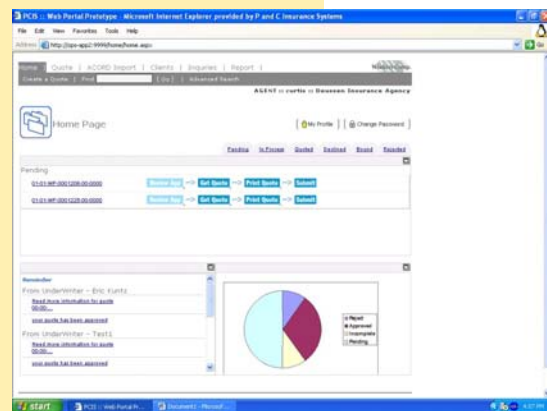

PCIS leads the industry with its Vision suite of insurance solutions for small and mid tier companies. Vision is a fully-integrated, proven multi-company, multi-state, system which handles all aspects of the insurance life cycle including quotation, rating, issuance, policy management, premium accounting, agency interface, claims management, audits and reporting.

**PCIS celebrates over 30 years of success and dedication to the industry!**

## POSVision™ Offers New Capabilities for Workers' Comp System

POSVision™ 2.0 is a .NET browser based point of sale system in production for the quotation, rating and issuance of workers' compensation policies. POSVision™ 2.0 now features **Instant Messaging**, between agents and the carrier, and boasts an **automatic Acord form upload** to the portal. This system can be implemented as a stand alone product which can be interfaced to any legacy or 3rd party policy administration system or in conjunction with PCIS' Vision™ policy management system.

POSVision™ provides web technology to MGA's and Carriers at a very reasonable cost of entry.

## Signing a Contract to Live in 10 Months - 40 States

Sound too good to be true? Work First Casualty Company (Work First) did it when they chose PCIS' flagship software system **CompVision™**. After an expansive nationwide search for an integrated, robust, proven system Work First chose **CompVision™** as their core insurance policy administration system and just ten months later found themselves live in 40 states.

Work First was established in 2005 to specifically address the underserved temporary staffing industry and currently writes worker's compensation in 40 states.

CompVision™ is a comprehensive solution that integrates policy issuance, underwriting, claims and accounting functions, management and statutory reporting, as well as audits.

It enables insurance carriers like Work First manage their business effectively and has an intuitive easy to use workflow.

"Like all of our products, the workers' compensation system is a tool that can be fully controlled by the user. We don't need to send in programmers to make changes, and that saves our customers both time and money," said

*"The growth of our company over the last three years has created the need to automate the entire life cycle of our products. We selected the PCIS system because of its comprehensiveness, flexibility, and especially because it is in production in a large number of states."*

## PCIS - StrataCare Joint Aipeks Development

P&C Insurance Systems, Inc. (PCIS) was engaged by StrataCare in a multi-million dollar contract to design and develop Aipeks, a true browser-based "Best In Class" Workers' Compensation Claims Management application. Aipeks is built upon 30 years of workers' compensation claims application domain knowledge utilizing the latest Microsoft technology of ASP.NET, reporting services and XML for Business-to-Business (B2B) interfaces.

Aipeks Claims Technology is the first "Best-in-Class" Claims Management and Bill Review application built with seamless bidirectional integration. Aipeks is designed, engineered and

built to deliver paperless, electronic workflow, Internet and Browser-based claims management. P&C Insurance Systems is currently working on the second phase of development for StrataCare which includes the addition of a multi-line capability to Aipeks as well as integration with PCIS' policy management system.

StrataCare, a Microsoft Gold Certified partner, is a leader in Medical Bill Review software. P&C Insurance Systems celebrates 30 years of excellence in developing and supporting insurance software applications.
